+91-9999999999    abc@gmail.com    linkedin.com/in/john-doe    github.com/John-doe

## Technical Skills

**Languages:** Java, Python

**Technologies:** Spring MVC, Spring Boot, Active MQ, Kafka, MySQL, Redis, Hibernate, Git, Flask, LangChain

**Concepts:** Data Structures and Algorithms, DBMS, API Design, Query optimization

## Experience

### whatsapp

Present

*Software Development Engineer (SDE) III*

- Rewrote the entire messaging app codebase from Java to Go.
- Utilized Go, MySQL, and Kafka technologies for the development process.

### Mercor.AI

2018-2022

*Software Development Engineer (SDE) I-II*

- Designed and implemented the authentication system from scratch, contributing to a revenue increase of \$200 million in Q4 2021.
- Worked on Java Spring Boot microservices, MySQL, and Kafka technologies.
- Promoted to SDE II and contributed to the development of the employee dashboard, generating additional revenue for the company.

### Meta

2016-2017

*Data Science Intern, Transportation Team*

- Conducted visualization and prediction analysis of truck movements in and out of warehouses daily.
- Utilized Python, Django, TensorFlow, and Pandas for data analysis and visualization.

## Education

### Indian Institute of Technology (IIT) Kanpur

2018-2022

*Bachelor of Technology in Computer Science and Engineering*

Uttar Pradesh, India

### Delhi Public School Allahabad

2017

*Higher Secondary Education (Class 12)*

Allahabad, India

## Projects

Social Coding Platform | *Java Spring Boot, Hibernate, MongoDB, Python, JavaScript, Bootstrap, CSS*    /social-coding-experience

- Built a social media platform for coders integrating various coding platforms like CodeChef, Codeforces, LeetCode.
- Developed a dynamic dashboard for viewing statistics from different coding platforms, featuring global and friends leaderboards.
- Implemented features for connecting with friends and sharing coding experiences.

Weather App | *Flask, Python, AWS*

/mizan/weatherrepo

- Developed a CLI weather app using Flask and Python, integrated with LLM to suggest appropriate clothing based on weather.
- Deployed the application on AWS for accessibility.

## Achievements

### Stood first in Smart India Hackathon

- Built an ecommerce website from scratch in 25 hours.
- Utilized CSS, JS, Kafka, React, and Java to develop the website.

### Built a COVID Tracker

- Developed a COVID tracker application.
- Implemented features to monitor and track COVID cases.

### Employee of the Month (Amazon)

- Received the Employee of the Month award for three consecutive years at Amazon.
- Recognized for exceptional performance and contributions to the company.
